

LEGAL CASE MANAGEMENT SOLUTION SERVICES

Axiom's Legal Case Management System can be tailored to meet your specific business requirements.

Axiom is a leading systems integration and solutions firm that partners with clients and best of breed software providers to achieve superior performance through the use of information technology. Axiom provides a full range of consulting, implementation, integration & development, networking, and scanning solution services for clients ranging from small business to State, Local and Federal Government. Axiom's ability to provide a complete range of capabilities within each of these core industries ensures the client receives the best possible solution and desired results from each engagement.

Axiom also provides a Legal Case Management System that was designed for law firms such as yours.

Axiom's Legal Case Management System can be deployed on a client-server environment. Our client-server platform can be migrated to a browser-based platform with no conversion required. The system will support the following:

- Microsoft Windows standard navigation
- Utilization of multiple roles like Attorney and Support Personnel
- Relate multiple cases to clients
- Enter virtually unlimited detail about case entries
- List cases for specific or multiple attorneys in a case
- Access any case information from one screen
- Enter, modify and delete data
- Monitor status of cases
- Search on multiple fields and by soundex
- Review all cases in which a person is involved
- Maintain multiple addresses/contact information
- Print/Run standard reports
- Open or view any type of document, including images, Adobe and Microsoft
